

We Are Not a Psychological Group

Note: This sourcing should go into the long term sourcing book.

- When we get asked what kind of work we do and whether it is psychological, the answer is “no.” Our work is not about going down the issues, we don’t know what to do with that. Kalindi has made many talks about that.
- The work on ourselves that we do is all related to the heart. It is not a psychological thing. We’re not a psychological group. From our hearts we ask the question, “what is stopping the heart from living with God?” That is what we are about in our work and our work processes: “What is stopping your heart from living in love, ecstasy and peace with God?” That is forever what our work on the floor is about. It’s all about the heart opening up and trying to get back to God. And all these things are stopping the heart. That’s what our work process looks like.
- Our therapists, our coaches, our mediators, our meditations, our horseshoe work, everything – is the heart to return to the Father. And what is stopping that? Why can’t your heart return? The heart and soul – return to God.
- It is important that this is also the type of work that happens in the Seminars.

Direction for the College

- The college will be called a spiritual college and it is part of our church.
- The point is that whatever we offer is spiritual, not something material.
- We have to get certificates to the people who will be teaching at the college so that they’re ordained by the church as spiritual therapist, spiritual coaches, etc. It all has to fall into the spiritual, not the material. For example Jennifer would be spiritual therapist for the Journey of the Heart.

(Note: Kalindi mentioned that there would be a different “category” in the college under which business coaches could give courses.)
