**RE: Teaching – Giving People Responsibility**

---

This sourcing is being sent to David Kramer for the Forward Thinking Group, Meg Macpherson for the Home Center Board of Directors, Colleen Saggese for the Cabinet and Karen Tenney for the SLCLC.

---

- M** • People need to stand up into the light. Give people responsibility. There are still so many of the same people leading the Mission. People are not seeing other people making it anywhere – spiritually or stepping up in their service after ten years or so.
- There is a feeling that people are just sitting on the sidelines and are waiting and watching to see what is happening – is anybody making it anywhere?
  - We really have to pull people up and by doing that, expansion will happen. That is what we have, manpower. We might not have a lot of money, but we have manpower, and manpower can generate.
  - Everyone is so devoted, and if people are given the right thing they blossom spiritually and in their service. Then one flower will bloom and the next and next and then all the sudden there is a new energy coming.
  - If people are not given the right thing, they won't bloom and just get older.
  - People need to be lifted into a cause, whether it is Come to God and we really figure out how people can do that, or it's to break free. There should not be anybody sitting and not feeling the total light and expansion of that light.
  - There are people who cannot feel it, even though they are giving, but there is a feeling of deadness. They are not feeling that connection to the energy and the movement and Gourasana.
  - There needs to be a lift of the people into the glory of the Mission and the glory of the path that they are on. They need to start connecting to that the light and the expansion of the light.

*(Note from Jim: This can go out and also Jim wants to have further discussion with Rachael as to how do we hit the ground for this or that person...)*
